Company Overview

DynTek is a leading provider of dynamic technology solutions to government organizations nationwide. Our services encompass document imaging, records management, back-file conversion, distributed architecture solutions as well as client-server and web enabled technologies. DynTek has been providing document management solutions to state and local government agencies within the state of California for years.

Our customer engagement style is to understand your methodologies and goals in order to work together as a partner, rather than simply a vendor. Through our strategic partnership with Westbrook Technologies, a leader in document management solutions, we bring to the state of California a solution and company that has earned a reputation for providing successful solutions to customers around the world.

The Fortis software suite is a leader in the document management industry because it is easy to use and administer, feature-rich and lists at a very competitive price point.

- Electronically capture, store and organize documents and business information, enabling quick and reliable access to critical information
- Capture documents from any source (scanned, faxed, electronic files)
- High levels of security with several levels of authentication built into its design
- View and manage more than ***200 different*** industry standard file formats
- Share or distribute documents via LAN, WAN, Internet/intranet, e-mail, fax, CD, etc.
- Product Suite offering levels of integration techniques; OLE, DDE, COM API's, Active x, XML controls and in the thin client, HTML

With options for Microsoft Office integration, ERM (Electronic Report Management), CD publishing, and Web-enabled importing, viewing and editing, Fortis can help you solve any document or information challenge.

DynTek Product Reference List

Product A: Electronic Document Imaging	**Product F: Database Management Systems**
Software: Fortis, File Magic	***Software:*** Fortis, File Magic
Product B: Electronic Document Imaging	**Product H: Capture Sub-Systems Software**
Software: Fortis, File Magic	*Software*: Fortis
